- A. The purpose of this section is to define a standard procedure for determining reasonable costs and times for purpose of making equitable adjustments under Article 3, CHANGES, of the Standard Contract Provisions, General Provisions section.
- B. Unless otherwise specifically provided in the contract, the following procedure shall be used:
1. Where the nature of the change is known sufficiently in advance of construction to permit negotiation, the parties shall attempt to agree on a fully justifiable price adjustment or adjustment of time for completion.
  2. If the parties fail to agree upon an equitable adjustment prior to the time the proposed change affects the contract work, or if the Contracting Officer determines it is not feasible to reach an agreement regarding an equitable adjustment, either due to lack of time or other reasons, the Contracting Officer will order the change in accordance with Article 3 of the General Provisions and the Contractor shall proceed with the execution of the work so changed.

- C. Equitable adjustments shall be determined in the following manner, unless otherwise specifically stated in the contract.
1. Whenever a change is proposed or directed, the Contractor shall submit a proposal or breakdown within fifteen (15) days of its receipt of the change, and the proposal will be acted upon promptly by the Contracting Officer.
  2. Price Adjustments:
    - a. If agreement on costs cannot be reached prior to execution of changed work, payment will be made for the actual costs provided records of such costs are made available and that such costs are reasonable and predicated on construction procedures normally utilized for the work in question. If not, then payment shall be based on standard trade estimating practice.
    - b. Where basis of equitable adjustments is the actual cost incurred in performing changed work, the Contractor shall furnish the District with a complete breakdown of costs, covering the subcontractor work, as well as his own, individually itemizing the following:
      - i. Material quantities and unit prices
      - ii. Labor hours and basic hourly rate for each labor classification
      - iii. Fringe benefits rate for each classification
      - iv. Construction equipment
      - v. Overhead

    - d. The percentage for overhead, profit and commission to be allowed shall in no case exceed the following and shall be considered to include, but not limited to, insurance, other than mentioned herein, field and office supervisor and assistants above the level of foreman, incidental job burdens and general office expense, including field and home office. No percentage for overhead and profit will be allowed on FICA (Social Security), FUTA (Federal Unemployment and DUTA (District Unemployment) taxes:

	Overhead	Profit	Commission
1. To Contractor on work performed by other than his/her own forces.	-	-	10% of value of work performed

- |    |   |     |     |                             |
|----|---|-----|-----|-----------------------------|
| 2. | To Contractor and/or Subcontractor for that portion of work performed by their respective forces. | 10% | 10% | -                           |
| 3. | From Contractor on deleted work to have been performed by other than his/her own forces.          | -   | -   | 5% of value of deleted work |
| 4. | From Contractor or Subcontractor on deleted work to have been performed by his/her own forces.    | -   | -   | 5% of value of deleted work |
- e. When a change consists of both added work and deleted work, the applicable percentage shall be applied to the net cost or credit.
- f. Where more than one tier of subcontractors exists, they shall be treated as one subcontractor for purposes of markups. That is, only one overhead and one profit percentage for the subcontractors and one commission percentage for the prime Contractor shall be applied to actual cost of work performed regardless of the number of tiers of subcontractors.
3. Changes in the period of performance: Where a change affects the time required for the performance of the contract, the Contractor shall describe in detail “cause and effect relationship” and how such change affects the specific contract work activities, current critical path, overall performance or work, concurrency with other delays, and the final net impact on the contract milestone(s), specifically stating the proposed decrease or increase in the period of contract performance in calendar days.
4. The changes in the contract period of performance, if any, resulting from change order work will be calculated in the following manner:
- a. New durations for work activities effected by the change order will be incorporated into the next computer printout. Time extensions will be directly based on the extent to which the contract completion date is hereby extended.
- b. Should new work activities be required to supplement existing activities, they will be incorporated into the computer printout to verify total effect, if any, on the contract completion date.
- c. Every attempt will be made to reach an agreement between the Contractor and the COTR on the number of days by which activity duration will be extended. Should an agreement not be reached within fifteen (15) days after Contractor receives the directive, the COTR will assign a reasonable duration to be used in determination of job progress.

- D. If performance of the work is delayed by any of the causes specified in Article 5 of the General Provisions, TERMINATION-DELAYS, of Standard Contract Provisions for Construction Contract, 1973, as amended, a contract time extension may be justified.
1. The Contractor, when requesting an extension to the contract period of performance, must submit the same in writing with supporting facts and backup documentation plus a detailed explanation that must include, but be not limited to, the following:
    - a. Reasons/cause and responsibility of each delay
    - b. Inclusive dates of each delay
    - c. Specific trades affected
    - d. Portion (s) of each work contract activity affected and the duration thereof
    - e. Status of work activity affected before delay commenced
    - f. Concurrency of any other delays, including Contractor's own
    - g. Net effect of each delay under this request, on the overall contract completion
    - h. In the case of late delivery of materials and/or equipment, back up date, correspondence and documentation should include but not be limited to the following: establishment that prior to ordering there was a reasonable assurance of timely supply; copies of each purchase order establishing the dates of procurement, invoices, delivery receipts and the like showing shipping or delivery dates; and copy of correspondence showing diligent attempts to follow ups to obtain materials when critically needed from other sources.
  2. All documentation should demonstrate that any delay was unforeseeable and without the fault or negligence of the Contractor, subcontractor or supplier involved. The Contractor will be entitled only to the additional number of days the project is delayed which is not concurrent with another delay for which a time extension has been granted or for which a valid request has been submitted.
  3. In case of delays due to strikes, documentation shall include evidence of when and what trades struck, with reasons for the strike, prompt submittal of notice when the strike was ended and the date thereof, analysis of the effect of the strike on the completion of the contract work.
  4. In case of delays due to unusually severe weather, documentation shall include daily temperature and precipitation records for each period of delay involved and explanation of delaying effect, including number of days that the construction activities on the current critical path at the time were actually delayed, including any extended impact, beyond the normal anticipated days of delay due to the weather conditions.

E. **COST AND PRICING DATA** (applicable to a Change Order or Modification) :

1. Unless otherwise provided in the solicitation, the Contractor shall, before negotiating any price adjustments pursuant to a change order or modification, submit cost or pricing data and certification that, to the best of the Contractor's knowledge and belief, the cost or pricing data submitted was accurate, complete, and current as of the date of negotiation of the change order or modification.
2. If any price, including profit or fee, negotiated in connection with any change order or contract modification, was increased by any significant amount because (1) the Contractor or a subcontractor furnished cost or pricing data that were not complete, accurate, and current as certified by the Contractor, (2) a subcontractor or prospective subcontractor furnished the Contractor cost or pricing data that were not complete, accurate, and current as certified by the Contractor, or (3) any of these parties furnished data of any description that were not accurate, the price or cost shall be reduced accordingly and the contract shall be modified to reflect the reduction.
3. Cost or pricing data includes all facts as of the time of price agreement that prudent buyers and sellers would reasonably expect to affect price negotiations significantly. Cost or pricing data are factual, not judgmental, and are therefore verifiable. While they do not indicate the accuracy of the prospective Contractor's judgment about estimated future costs or projections, cost or pricing data do include the data forming the basis for that judgment. Cost or pricing data are more than historical accounting data; they are all the facts that can be reasonably expected to contribute to the soundness of estimates of future costs and to the validity of determinations of costs already incurred.
4. The following specific information should be included as cost or pricing data, as applicable:
  - (a) Vendor quotations;
  - (b) Nonrecurring costs;
  - (c) Information on changes in production methods or purchasing volume;

The right of examination shall extend to all documents necessary to permit adequate evaluation of the cost or pricing data submitted, along with the computations and projections used. Contractor shall make available at its office at all reasonable times the materials described above for examination, audit, or reproduction until three years after the later of:

  2. On projects where work is to be executed in the area of storm drainage structures such as yard drains, curb drains and catch basins, the Contractor shall conduct a hose test using a fire hose under pressure from a fire hydrant.
  3. On projects where new work is to be connected to existing drainage lines, the Contractor shall conduct a test on each line affected to ascertain that the lines are clear and will handle their full capacity. Test shall be conducted with any apparatus that will establish the rate of flow.
  4. In addition to before and after tests specified in subparagraphs A and D of this section, the Contractor shall execute tests on new installations in accordance with the plumbing section of these specifications.
- B. All testing shall be performed in the presence of the Project Inspector and COTR. The Contractor shall notify the COTR two (2) working days in advance of the testing.
