**Reconstruction of Sherman Avenue N.W.**  
**Questions and Responses**

**QUESTION 1:** In the SP's on page 44 number 16 SPECIFICATION FOR BLACK STEEL TRANSFORMER BASE, this item is normally recognized in the DDOT Standards as having a galvanized finish with Black or gray poles. Is the SP correctly stated or should the bases have a galvanized finished?

**RESPONSE:**

Replace the following Special Provision with the following Clause.

56. **Streetlighting**

**(C) Material and Work Procedure:**

---

**Delete (part 14) and replace with (part 14 -A)**

**14 - A #16 CAST IRON POST**

The post shall be made up of three cast components. All cast iron components, regardless of the method by which they are produced and assembled, shall be uniform quality and appearance; true to pattern; fine surface texture; free from blow holes, porous spots, hard spots, shrinkage faults, wrap, buckle, cracks, die marks, and all other defects peculiar to the method of production used, which may adversely affect the use, appearance or strength of the component or post.

Each component shall be carefully and thoroughly cleaned of all sand, scale, fins, core anchors, welds, machine markings, projections, imperfections, etc., injurious to insulated electrical conductors or detrimental to its use or appearance.

Each separable component shall bear as pertinent a lot number, casting number, pattern number, or other identifying number for record purposes so that the production history may be traced and contractor shall make such history available to the District of Columbia on demand. The components shall not bear any other mark, lettering, numbering or identifying device not specifically authorized in writing by the District of Columbia.

All ornamentation and markings shall be sharp and clearly defined. The desired finish for these components shall be the finest surface of hi-grade fabrication with a minimum of grinding, machining, dressing, etc., in accordance with normal foundry practices. Excess dressing shall be cause for rejection. Bolt holes must be clean and true with good alignment in the companion pieces to permit the interchangeability of castings. The shafts shall be straight and true with not more than 3/8" deflection along the length when rotated on the end centers. The base shall be drilled so that it can be installed on a fifteen-inch (15") bolt circle foundation. With each pole supplied the manufacturer shall supply an extra base door.

The castings shall be Heavy Wall Cast Iron per A.S.T.M. A48-83 Class 30. All castings shall be true to pattern and of fine surface texture with a minimum of machining and/or grinding, and shall have a uniform wall thickness +/- 1/8". All components shall receive a coat of iron oxide red both inside and out. The components shall be given two coats of a two- part epoxy paint system. The color shall be gray and match Federal Color Chip # 16099. The coats shall be allowed to cure according the paint manufacturers specification before recoating and/or shipping. The components shall be wrapped and crated to protect them during

shipping and unloading. Any damage to the finish shall be repaired according to the paint manufacturer specifications at no additional cost to the District.

**Delete (part 16) and replace with part (16-A)**

**16-A. SPECIFICATION FOR GALVANIZED STEEL TRANSFORMER BASE**

The transformer base will have dimensions as detailed on Streetlight Detail sheets that are part of the Contract Documents. The base will be fabricated from hot rolled carbon steel meeting ASTM-A36. The base shall be 20 inches high, 16 inches square at the base and 13 inches square at the top. The top and bottom plates will be made of 3/4" minimum thick steel plate. The body of the base will be made of 7 gauge steel. The base will be provided with 4 (four) loose steel plate anchor clips to fasten the base to the anchor bolts. Each base will be provided with 1" x 3" bolts with nuts and washers to connect the post shaft to the base. The door opening in the base shall be 8 1/2" x 9" x 13 1/4" and the door shall be secured in place by an approved locking device. The top of the door shall have a full length piano type hinge that connects the door to the base. The base will be cleaned of all rolled-in mill scale, impurities and nonmetallic foreign materials. The welds will be cleaned of all weld flux. The base is to be degreased by immersion in a heated caustic solution, then pickled in a heated sulfuric acid solution. The base will then be rinsed in a fresh water bath to remove any residual effects of the caustic or acid baths. The base will then be immersed in a concentrated zinc ammonium chloride solution and allowed to air dry before being galvanized. The base, door and anchor clips are to be hot-dip galvanized to the requirements of either ASTM A123 or ASTM A153.

The shaft shall either be wrapped in a 3/16" U.V. inhibited plastic backed packing foam or cradled in a 1" rubberized foam base.

**QUESTION 2:** Under this Contract is the contractor required to file online for the DC DDOT D.TOP Public Space Permit? If so, what is the timeline for the Public Space Permit to be issued?

**RESPONSE**

Yes, apply for occupancy permit with DDOT's project No. and it will be no cost to the contractor.

**QUESTION 3:** Under this process is the Contractor responsible to pay for parking meter lost revenue? If so, what is the cost? Will this cost be reimbursable or should this cost be imbedded within the pay items of the Contract?

**RESPONSE:**

There are no parking meters on Sherman Avenue project limit.

**QUESTION 4:** Under this Contract will the new D. "No Parking" signs be required to be posted?

**RESPONSE:**

Refer to question No. 2. The "No Parking" sign will be issued as part of Occupancy Permit.

**QUESTION 5:** Under this contract must the Contractor obtain an Erosion and Sediment Control Permit? If so, what is that cost? Will this cost be reimbursed to the Contractor?

**RESPONSE:**

DDOT has already secured Erosion and Sediment Control permit for the detail shown in the plan. A copy of the permit will be provided to the contractor after contract award.

**QUESTION 6:** What is the required size of the ARRA project signs? There are two listed in the special provisions.

**RESPONSE:**

Detail of ARRA sign is shown in the SP Appendix 1 through 5 titled "American Recovery And Rinvestment ACT -Sign Layout Details"

**Add the following Special Provision.**

---

**72. PAYMENT FOR ARRA SIGNS**

Contractor shall place two ARRA signs on the project site, one at each end of the project. See Project SP Appendix for sign details. Measure and payment shall be in accordance with Section 616.05 of the DDOT Standard Specifications for Highways and Structures. Payment will be paid for as Item 616 012 Construction Warning and Detour Signs, per Square Foot.

Unlisted classifications needed for work not included within  
the scope of the classifications listed may be added after  
award only as provided in the labor standards contract clauses  
(29CFR 5.5 (a) (1) (ii)).

-----

In the listing above, the "SU" designation means that rates  
listed under the identifier do not reflect collectively  
bargained wage and fringe benefit rates. Other designations  
indicate unions whose rates have been determined to be  
prevailing.

#### WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can  
be:

- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on  
a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests  
for summaries of surveys, should be with the Wage and Hour  
Regional Office for the area in which the survey was conducted  
because those Regional Offices have responsibility for the  
Davis-Bacon survey program. If the response from this initial  
contact is not satisfactory, then the process described in 2.)  
and 3.) should be followed.

With regard to any other matter not yet ripe for the formal  
process described here, initial contact should be with the  
Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an

interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

---

4.) All decisions by the Administrative Review Board are final.
