AMENDMENT NO. A0005

PROPOSAL DUE DATED CHANGED FROM: June 4, 2008 at 2:00 p.m.
TO: June 6, 2008 at 2:00 p.m.

ADDITIONAL QUESTIONS FROM PROSPECTIVE OFFERORS

1Q. Answer 32 states that 225TB per site is the required initial capacity. However, this is contradicted by chart 1a which asks for only 65TB per site. We need to know which TB total is correct. if 225TB is correct, how much of the additional capacity (over 65 TB) is required for mainframe and how much is for open systems?

Question 33 also applies to this capacity issue

1A. Chart 1A represents year 1, 2, 3 growths; and the information in the chart is correct and shows OCTO's expectation of being at 225TB total by end of year 3. All pricing should be priced for Tier I.

2Q. Question 33 is asking for a breakdown of tier 1, 2, and 3 capacity by platform. However, answer 33 refers to chart 1a, which does not answer the tier breakdown inquiry; there is no mention of Tiers in the chart. The distribution of storage between the Tiers is critical to the development of the appropriate response to this RFP.

2A. Yes Chart 1A represents all Tier I storage. All Mainframe storage requires Tier I storage (see chart). We are not able to breakdown Open System Tier requirements at this point; therefore all pricing should be for Tier I. OCTO requires pricing for Tier II and III for Open Systems. OCTO does not take advantage of Tier II and III technologies, but our vision is to deploy this technology in the future.
