SECTION C: SPECIFICATIONS/WORK STATEMENT

C.1 SCOPE

The Office of Unified Communications (OUC) requires a Contractor to provide Handheld MC-75 Units and Printers per the aforementioned CLINs in Section B.3. The MC-75 device is the newest ruggedized PDA device from Motorola/Symbol.

C.2 BACKGROUND

The Office of the Unified Communications manages and maintains the Public Safety Communications system and infrastructure for all District of Columbia Public Safety agencies. These communication systems support Public Safety mobile data computing as well as regional communications interoperability. In its current role of supporting mobile data computing for multiple agencies with the District of Columbia, the Office of Unified Communication has identified an opportunity for improved communications and operations as it pertains to the Mobile Data Computing (MDC) initiative. The largest three agencies supported currently by the OUC in the MDC initiative are the DC Fire & Emergency Medical services (FEMS), the Metropolitan Police Department (MPD) and the Department of Commerce and Regulatory Affairs (DCRA). These agencies are currently utilizing the Panasonic Toughbook ruggedized laptops and the CAD I/Mobile application that are supported by OUC staff. While the use of these ruggedized laptops allows users more access to necessary communications and information in the field, there are a significant number of users who are unable to make use of these units due to logistical and user safety concerns. Extremely mobile units like foot patrol officers, motorcycle officers, horseback mounted officers, bicycle officers, Fire Inspectors and Housing Inspectors are unable to carry a full sized ruggedized laptop due to size constraints and lack of charging opportunities without a full-sized vehicle. In order to make available the most current technology to all officers and field agencies the OUC is proposing to expand its support of Mobile Data Computing to include PDA/Ultra Mobile computing devices for those officers who are unable to utilize a full sized laptop in the field.

The addition of these devices to the current lineup of deployed and supported technologies will take advantage of the obvious benefits that could be realized through their use. Improved response times to events in the field, reduce radio traffic through the use of I/Mobile and CAD dispatching and improved officer safety through added communication and GPS reporting are only a few such possible improvements possible through the adoption of these devices. The utilization of electronic ticketing and reporting would yield large gains in productivity as well as increased revenue from electronic citation issuance.

C.3 REQUIREMENTS

C.3.1 The Contractor shall furnish only and deliver the materials in Section B.3 to the Office of Unified Communications (OUC), as a complete single shipment, and shall coordinate with OUC staff regarding the delivery date and time at least 1 full business day in advance of the actual delivery to insure availability of loading dock space and receiving personnel.
