

**D.C. DEPARTMENT OF CORRECTIONS  
CENTRAL DETENTION FACILITY**

**TELEVISION SYSTEM UPGRADE**

**STATEMENT OF WORK**

The DC Department of Corrections (DOC) Central Detention Facility, located at 1901 D. Street, S.E. Washington, D.C. 20003 is seeking a contractor to upgrade the current television capability, infrastructure and hardware.

**Hardware**

- a. 56 New “Smart” TV’s 26” capable of SD or HD with audio. One TV will be for the Warden to monitor his televised messages.
- b. “Smart” TV controller with PC for daily programming and control of “Smart” TV’s.
- c. Input audio and video switch for the source selection.
- d. 8 New ATSC RF tuners, for the head end system will provide reception of current HD stations and SD signals so no loss of signal in February 2009. This will allow for 8 off air channels (4, 5, 7, 9, 14, 26, 32, 50, and the Correctional Learning Channel), one playback channel and one channel for Warden’s live presentation.
- e. DVD/VCR for play back of DCDOC material.
- f. Camera and microphone for live presentations.
- g. RF BIDA amps and new taps.
- h. New UHF antenna and head end distribution

**Integration Description**

Vendor shall convert the old RF cable to Bi-directional cable which will require removing all the RF amps and replacing them with BIDA amps, all the splitters and taps will be replaced with reverse channel taps.

“Smart “ TVs will replace all the current TVs and will provide all the normal controls of any TV in addition, they will all be controllable from the head-end controller, i.e., Command Center will be able to turn on and off whatever function is needed. This will

enable the TV to be powered on and off and the volume turned up and down but not with channel changing. Each TV will have an address code for individual control allowing for different controls at any given time. This technology will enable DOC to program a broadcast for a particular time to all TVs. Programming will be loaded on the head-end system. For any TVs that are not on at this scheduled time, they will be set to that specific channel and volume. This will be set up for programming to meet DOC needs at the time of installation. Set up shall be for more than selected channels, thus allowing DOC to change between channel 47 and 51.

Placing all DOC source devices on unused UHF channels, and providing no local channel up/down control will prevent unauthorized viewing. This entire system can be turned off at any time from a single location. DOC may add on any standard TV to the system that has a UHF tuner, and it will receive any of the channels from their source devices that are on a; i.e., watch a taped movie on the channel that will not disable the rest of the system.

This system will be PC based and can be added to DOC LAN and be operated from anywhere they have a LAN connection exists. The needed PC to connect to the head-end controller will be provided by DOC. Vendor shall provide the software for the head-end controller.
